EDUCATION

North Carolina State University

Aug 2023 - May 2025

Master's, Computer Science

GPA: 4.0

- DBMS, Automated Learning & Data Analysis, Design & Analysis of Algorithms, Computer Networks, Statistics, Neural Networks & Deep Learning, Cloud Computing, Social Computing & Decentralized AI, Privacy in Digital Age, Applied Artificial Intelligence

Jaypee Institute of Information Technology

Aug 2018 - Jan 2022

Bachelor's, Computer Science

GPA: 4.0

- Big Data Analytics with Hadoop and Spark, Database and Automata, Agile Software Development, Software Engineering, Computer Networks, Operating System, Computer Architecture, Project Management

SKILLS

- Languages:** Python, PHP, C/C++, HTML5, CSS3, JavaScript, R Programming, VBA, TypeScript, React.js, AppScript, Xamarin
- Databases and Visualization Tools:** Microsoft SQL, MySQL, PostgreSQL, MariaDB, Power BI, Looker, Excel/Numbers/Sheets
- Cloud Technologies:** Google Cloud Platform, Azure SQL, AWS, Firebase

CERTIFICATIONS

- IBM Data Science Professional
- Google Cloud Engineer Certificate (WIP)

PROFESSIONAL EXPERIENCE

iSimcha, LLC

Durham, NC, USA

Data Scientist & AI Developer Intern

May 2024 - Present

- Spearheaded the development of a Python process to efficiently extract and preprocess more than 500,000+ clinical trial records from nested JSON files, facilitating seamless integration into Firestore for data analysis.
- Conducted an assessment of the readability and comprehensibility of LLM-translated medical data using Python and BigQuery and created a comprehensive visualization dashboard for data-driven decision-making process
- Leveraged ChatGPT, Mistral AI and Vertex AI's Gemini 1.0 Pro Generative Model to transform complex clinical trial data into simplified terms in accordance with specific guidelines, enhancing readability and accessibility for a wider audience.
- Integrated LLM processes with Arize Phoenix and Langfuse's LLM as a Judge evaluation tools to enhance model performance monitoring, evaluation, and debugging, resulting in improved accuracy.
- Developed responsive, data-driven web applications using ReactJS, CSS3, and integrated with Firebase for efficient real-time data management.
- Implemented Firebase Authentication and anonymous user tracking for enhanced user engagement and analysis.

AXA XL

Gurugram, Haryana, India

Senior Data Analyst

Feb 2022 - Jul 2023

- Designed and developed restructuring tool and new internal allocation process for insurance treaties which reduced calculation time by 40%.
- Implemented new data analysis and automation tools using SQL and Python and optimized the allocation and restructuring process to improve efficiency and accuracy in actuarial processes.
- Identified business needs to develop data-driven solutions with cross-functional teams and stakeholders.
- Created allocation and automation tool for actuarial modules, cutting time required to construct tools by 75%.
- Developed and implemented data governance policies and procedures to ensure data quality and consistency across the organization.
- Created visualization dashboards using PowerBI.
- Built an integrated Python and JavaScript based data analysis and quarterly BAU automation tool.

Provin Technos Pvt. Ltd.

Delhi, India

PHP Web App Developer

May 2020 - Aug 2020

- Built a web based ERP system from planning to delivery in collaboration with company representatives.
- Created user interface using HTML5 and CSS3 practices and used programming capabilities in PHP, SQL to create web application components and deployed using AWS.

PROJECTS

Enabling Geriatric Exercising for Senior Population in Remote Areas

- Developed Python based Computer Vision software for Enabling Geriatric Exercising for Senior Population in Remote Areas under TIH IoT CHANAKYA Graduate Grant offered by IIT - Bombay

Gait Biomechanics

- Created a comprehensive ML system to analyze gait factors, correlations and effects of speed and inclination with angles at various joints in the human leg using Python to understand Gait Biomechanics

Database Management

- Designed Entity Relationship diagrams and a database for a parking management system using Java (JDBC), MySQL and RDBMS MariaDB

Plant Disease Classification

- Neural Networks project to develop an upgraded CNN based model for identifying and classifying Plant Diseases.

Multi-Agent Simulation of Voting Behavior in Elections

- Designed a multi-agent simulation using MESA to analyze the manipulability of voting systems under varying societal polarization levels.

YELP Review Sentiment Analysis

- Explored sentiment in user-generated YELP Reviews using NLP techniques to gain insights into customers.
